PRICE \$2.00 Per Year in Advance.

THE EXAMINER'S WEEKLY REVIEW OF PROV. MARKETS

(Thursday September 28th)

CATTLE

Beef—Edmonton prices have held up fairly well, and reduction due to new tariff not as bad as anticipated. Choice heavy and light beef steers, \$4 @ \$4.50; good \$3.25 @ \$3.75; medium \$2.50 @ \$3; common, \$1.50 @ \$2.25. Choice cows, \$3 @ \$3.25; good, \$2.25 @ \$3; medium, \$2 @ \$2.25; common \$1.50 @ \$1.75. Canners, 75c @ \$1.25. Choice heifers up to \$3.50. Bulls and oxen unchanged. Calves slightly better at \$3 @ \$4.25 for choice and common \$2 @ \$3. Feeders and Stockers—Demand continues fair with best feeders \$2 @ \$3.50, and plainer ones \$2.50 @ \$3; stocker steers \$1.50 @ \$2.75. Stock heifers unchanged at \$1.50 @ \$2; stock cows from \$1.75 down. Receipts continue heavy.

HOGS

Hogs receipts at Edmonton have not been heavy and sales have been generally made at \$10.

GRAIN

Markets have lost the beneficial effects of the war scare, and though conditions are not unduly in the near east yet, to prospects are improving. Grain is being moved very rapidly to the east and there is a scarcity of tonnage which threatens to be serious. The disastrous effect of the war scare is that until there is a readjustment of the present difficulty it does not give European nations a chance to get down to production and get the money to buy our grain.

PRODUCE

Butterfat—Calgary creameries advanced prices today 2c on all grades; special 34c; No. 1, 31c; No. 2, 28c; off grade, 23c; another advance shortly would not be surprising. Creamery Butter—Carlots basis specials 35c and 40c on No. 1 and No. 2. Dairy Butters—

Bulbs Suitable for Winter Flowering

During the long cheerless winter months when all outdoor plant life has shed its leaves and flowers, what could be finer or more desirable than a few gaily colored flowers to brighten your home where most of the time must be spent indoors.

For this purpose flowering bulbs of which there are a great many different kinds fill a most important place, not only a few of those requiring ordinary conditions for their development, and of easy culture will be dealt with.

Hyacinths—The Dutch and Roman varieties, in my opinion hold first place for their fragrance, beautiful flowers of many colors and easy culture.

To obtain satisfactory results with either good bulbs are essential, they should be mature, good sized, smooth and heavy.

Holland produces the supply of Dutch Hyacinths for the world, and the industry is almost as important as the dairy industry there. Hyacinths are propagated from very small bulbs which take from three to six years to mature. Many cheap bulbs which are placed on the market by growers in need of money, generally immature bulbs which are not satisfactory, and it is better to purchase a few good bulbs at a reasonable price than a lot of cheap ones of inferior quality.

The Roman Hyacinth is grown almost exclusively in France and imported to other parts of the world. The Dutch Hyacinth is doubtless the most useful of bulbs for indoor culture and a general favorite. There are two varieties, single and double in a large variety of beautiful colors.

Each mature bulb should produce one large well formed spike of bloom, and the single variety is preferable to the double, as they generally produce finer flowers and both can be grown in pots or water with the same treatment.

To grow in pots, prepare the soil by mixing one part each of thoroughly rotted turf, well rotted cow manure, leaf mould and sufficient coarse clean sand to make the compost porous, pulverize all thoroughly and place in a heap in the sun, turn and mix each day for four or five days before using.

Pots for single bulbs should be either four or five inch, according to size of bulb. In planting cover the drainage hole in pot with a cork or stone and fill to within one inch of the top with compost, which should be moist, pressing lightly.

Scoop out enough to hold the bulb

LOCAL NOTES

Mr. and Mrs. A. Norrindin are preparing to move into town for the winter months.

An extra switching crew has been put on and a number of men on the "trip" track and in the roundhouse were started as extras last week, so as to cope with the fall rush of business on the Canadian National at this point.

There was a large attendance at the harvest services on St. Patrick's church at Heath on Sunday last. The little church was profusely adorned with harvest emblems, an dthe thanksgiving offertory was very good.

Success certainly attended the efforts of members of the Catholic Women's League on Saturday, their sale of home cooking held in Miss Donovan's store netting them around \$400.00. The thanks of the organization are extended to all who helped to attain this result.

Fancy table at markets, 30c @ 32c dealers buying on grade from 23c down. Poultry—Live shipments unchanged; chickens 11c @ 13c; fowl, 10c @ 11c; old roosters 6c. Dressed chickens, and fowl 15c; some shipments of dressed fowl coming in spoiled. Potatoes—Only local demand; \$18 @ \$20 buying price at Calgary.

HAY

Trade very quiet and weakening prices. Green feed very plentiful and \$10 @ \$11 paid by dealers at country points; timothy offered at \$23 at Pincher and \$25 Coaldale Saskatchewan \$13 @ \$18, according to shipping point.

HIDES

Market slow but unchanged; prospects not very encouraging, owing to poor demand from tanners and heavy fall kill coming on.

Wainwright Oil Development Co. Passes Utilities Subscription Lists Now Opened; Development Work To Be Pushed Right Ahead; British Petroleum Limited Has Machinery Here Now; Have Secured Finest Rotary Rig Extant; Famous Oil Driller In Charge.

At the meeting of the directors and shareholders of the Wainwright Oil Development Company which was held on Wednesday last, truly optimistic reports were to hand regarding the indications at the local well which is Wainwright's very own.

It was shown that the strata through which the drillers are now passing is practically the same as was reached at the Imp. well at Fabyan only after several hundred feet of drilling and for this reason the natural gas which in the latter case was struck at about 800 feet from the surface will in all probability be available in a very short time and that the oil that liquid gold of Midas will naturally follow in due course just as it did in the Fabyan hole.

The Utilities Board have granted the company a certificate to place their stock on the open market and for the present an allotment of \$30,000.00 will be offered to the public. This in all probability will be eagerly bought up. The investment is, without doubt a safe one. This district has been examined by practically the finest geologists and oil men in the world and these agree that Fabyan-Wainwright district is likely to prove a veritable Eldorado once the oil-bearing sand is tapped. They are confident that Wainwright (and maybe a little to the east) is practically the center of a territory which shows by outcroppings and other signs to be indicated that it underlies oil in quantities too large even to guess at.

As a further evidence of faith in this oil field, the British Petroleum Limited, a company which is carrying the backing of some of the largest finance institutions in the world has decided that they will drill not less than three wells in this territory and as their holdings are all within ten miles of Wainwright there can be no doubt that the layman's faith in the field is now underwritten by the experts who have been engaged upon this proposition, consistent with the other advantages which have to be considered in matters of this kind. Numerous tests are still being made in this connection and the location will likely be public property within a few days.

We understand that it is the intention of the company to drill at least three holes in the vicinity of town, with as many more as become necessary after oil is secured; and in view of the fact that they have a large acreage in the neighborhood, Wainwright's future as an oil center is practically assured.

GAS SHUT OFF AT IMPERIAL'S No. 1 WELL

So far as can be learned from fairly reliable sources, the work still continues at the Imperial's well at Fabyan. It is rumored that

a nearly every state in the Union—notably in Texas, Louisiana, Oklahoma, Wyoming, etc.—during the past twenty-five years—and was right on the job in the now famous Mexia field. On account of his wide experience he has been brought here for the special purpose of developing the field, and states that the Wainwright formation has all the essential qualities of the Mexia field without doubt should prove to be fully as profitable as that field is now showing.

He will commence work just as soon as the location is decided upon, with a big "Triple X" rig of the rotary type, having a 22-inch hole, and the outfit which is being unloaded is fully capable of going down to a depth of 5,000 feet if necessary.

The first derrick which the crew will erect will be of gigantic proportions, standing as it will nearly 120 feet in height, thus making the whole rig one of the most modern and the very best procurable; and possibly the only drilling rig which is capable of overcoming the enormous pressure of natural gas which is now known to exist in this field.

According to the report of the famous geologist, Mr. Chas. Taylor, for the formation of the strata in the Wainwright field proves that it is of such a character that the underlying oil cannot escape there being no breaks in the formation as are so often found in other places, an dfor this reason the "chances of oil" are all the greater; although the company are prepared to go to practically unlimited depths to secure the "liquid gold" which they are confident is only waiting to be tapped.

With regard to the actual location of their first drilling, this has not yet been definitely decided upon, as it is necessary to some extent to be governed by the securing of an adequate water supply at the site, but without doubt it will be a location which has been decided upon as most favorable by the experts who have been engaged upon this proposition, consistent with the other advantages which have to be considered in matters of this kind. Numerous tests are still being made in this connection and the location will likely be public property within a few days.

We understand that it is the intention of the company to drill at least three holes in the vicinity of town, with as many more as become necessary after oil is secured; and in view of the fact that they have a large acreage in the neighborhood, Wainwright's future as an oil center is practically assured.

CLIMATIC CROP CONDITIONS GOVERN RIPENING PERIOD

In a series of experiments made at the Economic Experimental farm, it is determined that the time required to mature various grains, it was shown that in 1916 it required 159 days to mature Banner Oats, and 149 days for barley, calculating the time from the date of seeding to the date of harvesting. In 1917, Marquis wheat required 119 days, Banner oats and barley 98 days. In 1919, Marquis wheat required 129 days, Banner oats 120 days and O. A. C. barley 113 days.

It would appear that climatic conditions have a great deal to do with crop production in Alberta.

Arrangements have been made to hold the annual Red Cross membership drive from November 5 to 11th. It is hoped to enroll 50,000 members.

WEDDING BELLS

BRISLAN-McCARTHEY

A quiet little wedding was conducted on September 26th at the Presbyterian manse by the Rev. S. Davies, the contracting parties being Miss Margaret McCarthey and Mr. Charles William Brislan both of Edgerton. They have now taken up residence on the groom's farm in that district.

the eight inch casing has been set in the hole and that the stand ard drill is now reaching the Devonian formation of limestone beneath which it is hoped that a higher grade of oil will be found than that which blew out with the heavy gas some weeks ago.

Since that flow, the well has been capped to secure the gas, and the drillers are continuing right on down at a merry gait. There is, according to all accounts some likelihood of this well being heard from within a short time as it is considered quite probable that as soon as the time-stop is pierced the light oil which is capped by it will be procurable.

This company we understand are under contract to drill at least three more wells, and will likely proceed with the No. 2 hole in the near future. The location of the No. 2 well cannot be learned with certainty, much secrecy seeming to cover the intentions of this company, although it is mooted that it will be in the neighborhood of Buffalo Coulee about seven miles north east from the present site, while a third hole may be sunk in the Grattan Coulee south-west of Fabyan; in so doing the company could of course be testing the whole of the acreage held by them.

WHAT OIL WILL MEAN TO THE INVESTOR

As a writer in the Alberta Oil Gazette says:—It is hard to adequately conceive the effect upon local communities; it is, perhaps, still more difficult to realize what all this will mean to the happy individuals who have the courage and confidence to co-operate in the immediate development and who meet with success commensurate with what they merit. It is a known fact that wealth can come in larger volume and more quickly through the discovery of oil than through any other yet known agency. The mind al most staggered under the contemplation of the marvellous fortunes which have undoubtedly been acquired by those who have (to use a trite term) "struck oil."

Some of the richest men in the States owe their wealth to the "liquid gold" and even of the latest field of production—the now famous Sweetgrass field surprising stories are told. History has a trick of repeating itself, and it is surely not beyond reason that what has already happened in our United States shall happen in our not so boldly said in the truly favored Wainwright-Fabyan-Irma region.

Some of us are not yet forgetting our "Arabian Nights," yet even Arabian, scarce dreamed of greater things than are quite possible under the spell of this great new magician—Oil. For those who take an active part in the development of the golden field, what marvellous things may not be in store.

Some of us are not yet forgetting our "Arabian Nights," yet even Arabian, scarce dreamed of greater things than are quite possible under the spell of this great new magician—Oil. For those who take an active part in the development of the golden field, what marvellous things may not be in store.

ARRANGEMENTS NOW COMPLETED FOR THE TEACHERS' CONVENT'N

The date for the convention of teachers of the Wainwright Inspectorate have now been definitely set for October 19 and 20. The programme will contain several new features this year, among them being a question drawer and a rural school in operation for a period of one hour.

The opening session of the convention will be held in the theatre on Thursday evening the 19th, the principal speaker being Mr. A. E. Ottewill, director of the extension department of the university of Alberta. His subject will be "The why of education."

There will be other items produced by local talent and the programme will be followed by so much of entertainment. The public are cordially invited to this gathering.

Only eleven weeks to Christmas. How time flies!

LOCAL NOTES

By way of an exchange of pulpits on Sunday last, the Rev. S. Davies preached at Cadogan, and the Rev. Mr. McAllister, of that place took the services at St. Andrew's church.

We learn that little Billy Fish is down with pneumonia and expects complete recovery.

At the meeting of the Methodist church on Monday evening it was decided to hold a big dinner and chicken supper on Saturday, October 21st. All were asked to save the date.

Mr. Herb. Smith and family have completed their arrangements for the journey and will leave for the coast and California tonight.

We are glad to know that Mr. R. G. Dismore, of Wainwright, B.C. secured the full copyrights for both Canada and the States covering the play which he recently wrote and produced so successfully, under the caption "A Little Bit O'Color."

FINE HOLSTEIN BULL FOR GOV'T FARM

What is believed to be one of the finest young Holstein bulls on the American continent has been purchased by the Alberta government for the high-class Holstein herd at Stony Plain demonstration farm. This bull, Six Sylvia Carborn, aged one and a-half years, is the product of a long line of noted Holstein ancestors of the most aristocratic stock—ancestors which have held world records for milk and butter production.

It is never difficult to discover somebody whose sorrow is greater than ours.

Eastern Packers Buying Heavily

(By U.F.A. Livestock Expert)
A good many farmers and stock raisers at the present time who have not sold their surplus stock are wondering what effect the new United States tariff regulation will have on the live stock trade.

With the duty being increased approximately from 30c. to 75c. per hundred pounds, the old tariff was based on a straight duty of 30 c. whereas the new one calls for one and a-half cents per lb. on cattle up to 1050 lb. and two cents per pound on all those over that weight. We would naturally assume that with American markets practically setting the price on our stocker cattle that they would depreciate the value at least of the extra duty.

After considerable thought and investigation we do not believe we are justified in taking too pessimistic a view of the situation. The material improvement in the feed situation in various parts of the province during the past few weeks, enquiries from Ontario for stocker cattle, and a possible strengthening of prices across the line, lead us to think that very little change in prices will be noticeable. Eastern packers are buying heavily on the western markets, showing that supplies in their own districts are somewhat limited. Considerable thought is also being given to the possibility of stocker cattle being shipped to the Old Country, and while the trans-Atlantic trade at the present time looks prohibitive any prospect of lower rates would be immediately reflected here. Summarizing the situation we would strongly advise live stock raisers to fully post themselves on market conditions, as thousands of dollars have been lost to the raisers during the past few months for lack of this knowledge.

GRAIN GRADING HIGH

In a season like this, when the wheat yield in various portions of the province is not uniform and when the prices for grain are not as high as the producers would wish, a measure of satisfaction can be found in the fact that the wheat is grading high this year. Since the beginning of the shipping season, The Canadian National Railway are moving forward through Winnipeg 1,000 cars of grain per day.

UNIV. OF ALBERTA DISCOVERS PROCESS TAR DISTILLATION

Two announcements of much importance to Alberta have been made this week. One is that the research department of the university of Alberta has found a process by which a large proportion of the sand in the Athabasca tar sands can be removed, and the bituminous tar residue becomes a commercial commodity for shipping ready to use for road-making and other purposes.

The other announcement is that American capital has been secured to open up and develop the Butterfield iron ore deposits discovered about a year ago on the shores of Lake Athabasca. In the development of Northern Alberta both these matters are of great importance. If the tar sand products can be put upon the market at a reasonable price, the field for their use is unlimited. If the iron ore is in Alberta in large quantities, this, together with the proximity of coal as we have it, always forms the nucleus of a big industry.

GOOD CROP HELPS SOME

It is wonderful how quickly a fair grain crop in the west quickens the beat of the commercial and industrial pulse. For the first time in two years the car department at the Ogden shops of the C.P.R. at Calgary are working on full time. At Edmonton the Canadian National Railway is spending a quarter of a million dollars in building the first unit of their new western car shops.

The fond and foolish mother has helped to fill many a prison cell.

A man without standing finds fault with the street.

IT SURE DOES LOOK REAL GOOD

By way of offsetting the "poverty" cry of many of the smaller towns of the west, it should only be necessary to recite the following figures to show that Wainwright is not yet in the aforesaid category: Tax payments during the month of September to the town treasury totalled no less than \$13,991.53, while on Monday last (the last day of the 10pc. discount) a sum of well over \$6,000 was handed in at the office for the same purpose! Who wouldn't be town clerk and handle the "bone," like that, eh?

FIRE PREVENTION WEEK

- Oct. 2nd to 9th
- Candles should never be taken into closets where they may ignite inflammable materials.
- Use metal oil lamps not glass ones.
- Use only the best quality of oil.
- Have lamps with solid, heavy bases.
- Be sure that the wick fits snugly.
- Keep the burner clean; boil it occasionally with soda, lye or a strong soap solution.
- Keep the fuel trimmed evenly.
- Fill the lamp by daylight only.
- Be sure that the burner is tightly screwed into place.
- Wipe the reservoir clean.
- Do not set the lamp near the edge of a table or in any place where it may overturn.
- Do not set it too close to curtains or anything that will take fire easily.
- Do not leave a lamp too long unwatched.
- Do not leave the house without extinguishing the lamp.
- Have no gas flames without globes.
- If you have a gas mantle burner, be sure that pieces of the mantle cannot fall out.

THE FOOD VALUE OF SKIM-MILK

Although the fat of milk has a special nutritive quality which is necessary for the child and adult the bottom layer of the milk bottle contains much which is often unappreciated. Proof of the value of skim-milk as a food is daily being demonstrated by farmers everywhere in the feeding of young farm animals and when it is included in the diet of children and adults, it is an efficient and economical source of material which the body needs to build bone, muscle and other tissues.

Protein, the "body-building substance", is supplied by skim-milk. The quality of milk protein is of the greatest excellence, because it not only furnishes building material but supplements or protects that supplied by other foods and makes it of great value to the body. For this reason, the mother who makes use of all the skim-milk is practising real economy and providing her family with good food for growth and health. Foods which are a source of protein are usually expensive. Skim milk however, is an abundant and economical source of this substance and it is also the best and cheapest source of lime, which is necessary for the formation and repair of bones and teeth. Every mother wants her child to have strong, good looking teeth and this is only possible if sufficient lime is included in the food which he eats. There is a vital relationship between the young child's diet and good teeth as there is a relationship between strong teeth and good health.

Skim-milk also contains sugar for heat and energy for the body to do its work and is a source of water, soluble vitamins indispensable to good health and normal growth. It is deficient in fat and in the fat soluble vitamins, and therefore cannot entirely take the place of whole milk. Use whole milk, but do not be guilty of throwing away that which lacks only the fat and contains all the other nutrients. As a drink, in cooking, with cereals and with bread, skim-milk is an important and economical food.

TOWN OF WAINWRIGHT

Tax Sale Notice

Take Notice that the list of lots as published in the Alberta Gazette on the 15th day of September, 1922, has been sold by the Town of Wainwright on account of non-payment of taxes and the year allowed for redemption will expire on the 30th day of November, 1922.

If you wish to contest the legality of the sale of such lands you should immediately make application to the Judge of the District Court of the judicial district within which the land is situated for an order staying the issue of a certificate of title to the purchaser of such lands.

Dated at Wainwright, Alberta, this 21st day of September, 1922.
H. Y. PAWLING,
11-10 Sec.-Treas.

MORTGAGE SALE

OF FARM PROPERTY

Pursuant to the directions of the registrar and by virtue of the Powers of Sale provided by The Lands Titles Act, under a certain mortgage which will be produced at the time of the sale.

There will be offered for sale by Public Auction at the Town Hall in the Town of Wainwright in the Province of Alberta, on SATURDAY the Fourth Day of NOVEMBER, 1922:

at the hour of TWO o'clock in the afternoon the following property, namely:

The North-east quarter of Section Twenty-five (25), Township Forty-three (43), Range Five (5), west of the Fourth Meridian, in the Province of Alberta, of record in the Land Titles Office for the North Alberta Land Registration District.

Terms of sale to be Ten per cent. cash at the time of the sale and the balance according to the terms and conditions to be made known at time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserve bid and free from all encumbrances save the exceptions and reservations contained in the Duplicate Certificate of Title and taxes for the current year.

The vendor is informed that the above property is situated about three and a-half miles from the post office of Heath and 15 miles from the Town of Wainwright. It consists of 160 acres of farm land, 35 acres of which are broken and 25 acres are under cultivation. The land is all fenced with two-strand barbed wire. On the property is situated a frame house (24 by 24) in a fair state of repair, one granary (14 by 16), and a log stable.

For further particulars and conditions of sale apply to Messrs. Paylee, Freeman, Mackay and Howson, Barristers, etc., 103, C.P.R. Building, Edmonton.

Dated at Edmonton in the Province of Alberta, this 25th day of September, A.D. 1922.
PARLEE, FREEMAN,
MACKAY & HOWSON,
Approved: Vendors Solicitors
A. T. Kinnaird,
Dep. Registrar. 18-10.

WAINWRIGHT, ALBERTA, OCTOBER 4th, 1922

BUY AT HOME CAMPAIGN.
RECEIVES FURTHER ATTENTION

There is a great advantage, when you are making any kind of a
trade, in buying of someone who knows you and whom you know.
The high-stepping horse purchased of some stranger usually develops
fatal tricks; similarly there is a moral hazard in buying goods at
distant stores, where you are not well acquainted with the merchant
and his clerks.

When you make apurchase at some distant departmental store, or
distant city by mail, the person who handles the purchase is abso-
lutely a stranger. You are simply one item in the day's grist of
work, to be ground through the machine with hundreds of others.
You can't get intelligent thoughtful attention by such machine-
like methods.

In buying at home, on the other hand, you personally know the
people with whom you do business, or at least your face becomes
familiar enough for them to recognise you as a regular customer.
Both clerks and proprietor welcome you to their counter, and feel
that you must be satisfied at all hazards. Even if they wanted to
misrepresent, which is most unusual they would not dare do so.
You are too close to their base of supplies and you could cause much
harm if unsatisfactory goods were worked off on you.

When a personal relation grows up between the customer and the
nearby store, the salesman becomes more than a mere seller.
He conceives that the regular customer must be regarded as a client
who must be given good business advice about a purchase. Such
help is of incalculable value to the public. You can only get it
near home.—Hanna Herald.

And then again on the other hand no business man in any place
should allow a newspaper published in his town to go without his
name and business being mentioned somewhere in its columns. This
applies to all kinds of businesses—general stores, dry goods, gro-
cers, car dealers, mechanics, professional men, and in fact all classes
of people in business. This does not mean that you should have a
whole or half, or even a quarter page ad in every issue of the paper
but your name and business should be mentioned if you do not use
more than a two-line space. A stranger picking up a newspaper
should be able to tell just what business is represented in a town
by looking at the businesses mentioned in the paper. This is the
best possible town advertiser. The man who never will pay to get
publicity does an injustice to himself and his town. He is a man
who expects the newspaper to do the most free boosting for the
town. The man who insists on sharing the business that comes to a
town but refuses to advertise his business is not a valuable addition
The life of any town depends upon the live, wide-awake and liberal
business men.

The serious competitors of the retailers of this community are
the big stores of the big cities says a writer in an exchange, those
who send out catalogues and persistently talk through newspaper
publicity. Surely the poorest way to offset this competition is for
the local merchant to remain silent.

SKIM-MILK

(By Helen G. Campbell)

Skim-Milk is whole milk from which the first method than is left in
milk skimmed by a separator, but in each case a certain amount re-
mains in the milk removed.

The amount which remains de- The housekeeper who receives

The prejudice in the minds of
many people against skim-milk
is wholly unfounded. It is a val-
uable food providing nourishment
in one of the cheapest forms and,
though it lacks some of the de-
liciousness of whole milk, there
are many appetizing ways of
serving it and its value should
not be under-estimated.
Skim-milk requires the same
care in handling as does whole
milk. There is the same necessity
to keep it "clean, cold and cov-
ered" and the co-operation of the
producer, distributor and con-
sumer is just as important.

Canada's Interest In Europe

For many generations back the people of Canada and the United States with but few exceptions held the view that they were but little concerned in the affairs of Europe and that what nations and people there might or might not do was of little importance to the residents of North America. Of course, men of affairs and those engaged in international trade and finance were better informed, but the great mass of people gave little heed to European quarrels and economies, except as matters of news appearing in the papers.

The Great War breaking with startling suddenness in 1914 was a rude awakening, and the humblest and most remote home on this continent was made to realize that the human family was one after all, and that what deeply affected the people in Europe was the immediate concern of all. Not merely during the war years but since the Armistice that lesson has been painfully impressed upon our people. True, a certain school of political thought in the United States still seeks to maintain the old traditional policy of American aloofness from all participation in European politics and affairs, and they were powerful enough politically to keep the United States out of the League of Nations, and also strong enough to insist that the Republic a renewed declaration and tariff policy calculated to shut out as far as possible all foreign goods.

The more observant, far-seeing, and best informed people realize, however, that in these modern times of instantaneous communication and means of rapid transportation, no nation can live solely unto itself. In matters of trade, for example, it is now recognized that not only must production and consumption be fairly balanced in a country in order to maintain the condition of prosperity, but that there must be an economic equilibrium maintained throughout the world. Production and consumption must go together if the balance is to be kept right.

Business goes well when the various productive elements are properly balanced, and when different kinds of things are produced in right proportions. A great producing country is also a great consuming country if its equilibrium is maintained, but the substantial over-development or serious injury of any great industry throws the whole thing out of gear, and then depression and demoralization follow.

The world is suffering from such a situation today, because, on the whole, less is being produced than before the war, but there is a relative over-production of farm products and raw materials. This is due, not to conditions in America, but because of the fact that Europe, the world's great manufacturing centre before the war, and the world's great market for farm products and raw materials, has partially withdrawn from her pre-war position. She is turning out very much less of manufactured goods than before the war. She is consequently unable to buy raw materials and farm products in normal volume from the United States and Canada. As a result there is depression not only in Europe, but on this continent. We are, therefore, vitally interested in a revival of normal conditions in Europe and in everything that helps or retards it.

It is reasonable to expect improvement in Canada, even without improvement in Europe. This country, with its diversified industries, its wealth of resources, its great producing and consuming power, with its sound credit system, and its highly intelligent people, must forge ahead, and there is, therefore, no occasion for pessimism or lack of courage. None the less, we can not have really satisfactory business or anything approaching real prosperity until Europe is decidedly on the mend. We are part and parcel of a great world economic system, and distress anywhere reacts on us.

Under these conditions there are those in Canada, as the enactment of the recent high tariff demonstrates there are many in the United States, who believe that a remedy is partly to be found in tariff enactments designed to protect ourselves. Statements made recently by a leading economist before the Missouri Bankers Association, have a bearing on this subject and are worthy of being quoted as emphasizing how vitally interested Canadians ought to be in the rehabilitation of Europe. Warning United States' farmers not to be misled into thinking that a protective tariff is going to benefit them, this student of economics said:

"Prices of wheat and cotton and hogs and other articles are determined, not in the domestic market, but in the great world market. Canadian wheat competes with American wheat quite as effectively at Liverpool as it does at Chicago, and with Chicago and Liverpool in cable communication a delivery of Canadian wheat at Liverpool will break the price at Chicago quite as effectively as if it came directly to Chicago. It does no good to keep Argentine wheat out of New York if that Argentine wheat can come to Liverpool and so limit the market for American wheat in Liverpool."

Which only goes to show how interdependent all countries are, whether of Europe or America. Instead of fearing an inflow of goods from Europe to America, this economist declares it would be the most welcome thing that could come about, because a revival of manufacturing industry in Europe would immediately create a demand for the raw materials of all other countries, resulting in a revival, not in one country alone but in all agricultural and raw material producing countries. With such a revival their capacity to absorb manufactured goods would be increased.

At the present time with farmers and producers of raw materials unable to sell on profitable terms, they are also unable to buy in normal quantities. As Europe at present can only pay for farm products and raw materials with manufactured goods, we must accept such payment for our surplus products for export. The conclusion cannot, therefore, be escaped that, if a vigorous revival in Europe could be induced with a resultant revival on the part of our farmers and producers of raw materials, our domestic market for finished manufactures would also rapidly expand, and our own manufacturers would be much better off sharing an expanding market with European competitors, and would sell more goods and make larger profits, than they will by having a stagnant market exclusively to themselves.

German Coal Output Drops

Decrease Attributed to Reduced Number Working Days.
Coal production in the Ruhr district of Germany during June amounted to 7,078,861 tons, as compared with 8,081,351 tons in May, and with 9,558,385 in June, 1913. Average daily production had fallen from 236,445 in June of the preceding year to 210,544 in June of this year. The last May and to 208,034 in June. The decrease from the earlier months is ascribed to the reduced number of working days, the average daily production of June being about 12,500 tons lower than in May and 35,500 less than in March.

A Hundred Dollars Worth For Thirty-Five Cents

When you are awakened from a sound sleep by Cramps, when without a moment's warning you are seized upon, it's then that you would readily pay a hundred dollars for the quick relief you could secure from a thirty-five cent bottle of trusty old Nerivine. Nothing like Nerivine to relieve cramps, stomach gas, diarrhoea and kindred ills. Nothing better for Neuralgia, cold in the chest, and sore throat. Nerivine is thirty-five cents, no more, no less, in all stores where medicines are sold.

Aluminum Long Hidden
The earth is one-third aluminum. Yet this most abundant of all metals was scarcely more than a curiosity in the industrial world of twenty-five years ago.

THE WAY TO BE WELL

Good Health Maintained Through Rich, Red Blood

There are many men and women who, every few weeks, have spells of weakness, during which time they are little better than invalids; yet at other times they feel very well. Why does their health fluctuate so?

In the case of men and women overstrained nerves are usually responsible for this state of weakness and inability to face the anxieties of daily life.

As for women, her back aches, she is dizzy with sick headaches, and often has stabbing pains in the side. The only real health, in all her year-round health, and the secret of it is good, red blood and plenty of it. One of the best ways to get this blood is to take Dr. Williams' Pink Pills. There is scarcely a nook or corner of Canada where a woman will not be found who will tell you the benefit they have had through the use of these pills. And the reason is through the improved condition of the blood they strengthen and tone up the nerves. In all her year-round health, and at the same time have given new vigor to pale, delicate girls and women. The use of these pills in all run-down conditions is shown by the statement of Mrs. L. Williams, of New York, who says: "When I began taking Dr. Williams' Pink Pills I was in a weak, delicate condition, and suffering from all the depressing symptoms that accompany this run-down state of health. I had taken much medicine but it did not do me any good, and as I had a family of small children, I was unable to leave my home. I was so weak that I could not even get up to use the bathroom."

You can get Dr. Williams' Pink Pills through the dealer in your town, or mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Postponing Old Age

Work Hard, Play Hard, Rest Hard—Good Rule

Six veteran New Yorkers the other evening discussed "Old Times and New" in the town hall of the city. Every one of the speakers pronounced the note of optimism. Dr. Lyman Abbott at 85, Dr. Stephen Smith at 98, Maj. Putnam at 77, Dr. Simon Baruch at 81, Henry Holt at 81 and Dr. C. H. Parkhurst at 78, all emphasized the improvement in health and morals and general living conditions in the last half century. Through their long years they have been "too busy" to brood and indulge in "moods" and their hopefulness of spirit has helped to keep their bodies in tune. One survive the perils of childhood, the thing to do is to exercise reasonable care in the manner of living, and work hard, play hard and rest hard. The result will be a postponement of senility and a vast enlargement of the enjoyment and profits of life.

It has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will relieve the swelling from a burn or scald. It is the most persistent sore and will speedily heal cuts and contusions. It is a medicine chest in itself.

Tragedy of Loneliness

One of the great absurdities of civilization is the fact that on every hand men and women are slowly dying of the cancer the soul knows as loneliness. There is something awesome, but magnificent about the loneliness of mid-ocean. There is something terrible but inspiring in the loneliness of a mountain top. But loneliness in the midst of a crowd is one of the most dreadful tragedies to which humanity is heir.—London Daily Express.

Front Past Experience

"If you go first," said the wife, "you'll wait for me on the other shore, won't you?"

"I suppose so, dear," he sighed. "I've never gone anywhere yet where I didn't have to wait for you."

Long Distance Aerial Flight

Plan Aerial Race Around Edge of Civilized World For Next Year

Although planned as a pioneering flight, something in the nature of an aerial race around the edge of the civilized world will take place next year, possibly in the spring, according to Col. L. B. Broome, noted British aviator. He has completed arrangements for the flight between Canada and Japan, and has a complete map for the guidance of the aviators, with data on air harborage, trade winds, ocean conditions, fog and wind forecasts, and storm attacks.

Col. Broome predicts that three, if not more, machines will attempt the flight, which is being arranged by a syndicate of wealthy Old Country aeronauts for love of the sport and in the interests of aviation in general.

The Broome party, it is planned, will fly from London, going through France and the Near East over the route followed by Major Blake, who was recently forced to abandon his voyage, because of illness.

It is probable that the affair will be turned into a race, though that would be regretted, said Col. Broome. The Air Ministry is likely to be represented, as well as one or more of the British aircraft manufacturers.

Ask for Minard's and take no other

Peat For Commercial Use

Peat Beds in Canada Cover 37,000 Square Miles

Following a visit to the Canadian Government Peat Plant at Alfred, Ontario, Honorable Charles Stewart, Minister of Mines, is of the opinion that peat is rapidly becoming a commercial fact. He states that a high grade peat, the best he has yet seen, was turned out at the plant. Scientific tests have shown, Mr. Stewart stated, that 1.8 tons of peat are equal in heating value to a ton of anthracite. While not recommended for use in the furnaces, the peat is the best fuel for the furnace and for use in the fall and spring months. It cannot be surpassed for use in kitchen ranges and in fireplaces.

The total area overlain by peat in Canada, is estimated at 37,000 square miles, of which 15,000 square miles of an average depth of 6 feet are in Manitoba, Ontario, Quebec and New Brunswick. The Mines Branch Department of the Canadian Federal Government, claim that, when bog with shipping distance of Toronto are estimated to be capable of producing 26,000,000 tons of fuel, and seven bogs in the vicinity of Montreal and Ottawa could provide 3,000,000 tons.

Had Splendid View Of Sun's Eclipse

Astronomers Highly Pleased at Success of Photographic Plate

The astronomers had a splendid view of the solar eclipse from Woolool, near Broome, Australia, according to a despatch to the London Times from Perth. The sky was cloudless, and the observations were most successful. The United States expedition at Woolool, headed by Prof. W. W. Campbell, Director of Lick Observatory, saw a corona 40,000 miles wide, from which four long streamers of light shot forth, one extending 2,500,000 miles from the sun's centre, says a despatch to the Exchange Telegraph from Melbourne. The duration of the totality of the eclipse was four seconds shorter, and began fifteen seconds later than had been predicted.

The United States astronomers are said to be highly pleased at the success of the photographic plate, taken with the purpose of verifying Einstein's theory of relativity, namely, the bending path of a ray of light in its passage through the sun's gravitational field.

Tennyson's Son

Lord Tennyson, the son of the great Victorian poet, celebrated his seventh birthday, recently. For many years he acted as his father's private secretary, and later wrote his father's life. During the war he lost his wife and two sons, Harold and Aubrey. His eldest son, Captain the Test, was killed against Australia three times in 1921. Lord Tennyson has been Deputy-Governor of the Isle of Wight since 1913.

Several Forms of Sugar

Many varieties of sugars exist, cane sugar, maple and beet. Failing these we have corn sugar under the name of glucose or dextrose, and the same in vegetables, fruits and honey. In a brownish powder we find it on prunes or raisins.

Lactose, or milk sugar is another principal sugar, although it will never fill an important place in commerce. It exists in cow's milk, and plays an important part in nutrition.

Perhaps a widow finds it easy to get married again because she doesn't expect perfection in a man.

Newsprint Used In New York

Total of 582,000 Pounds Consumed In One Year

From estimates furnished by additers and others appear in figuring the statistics of New York City newspapers, six evening newspapers and six morning newspapers having Sunday editions, consume a total of 582,000 tons of paper a year at their present circulation, and calculating the papers on an average in size, for the past year. Just what this figure means can be more graphically realized by saying that this represents 582,000,000 pounds. As the newspapers, taken on the average of a ninety-eight page Sunday paper, weigh a full pound, it means that the two thousand tons of print paper is converted into close to 3,000,000 Sunday newspapers.

No Cause For Worry WHEN CHILDREN HAVE Summer Complaints

There is not a summer passer but that thousands of men, women and children are attacked by summer complaints such as diarrhoea, dysentery, colic, cholera, cholera morbus, cholera infantum, etc.

In looking for relief, you should not delay in getting a bottle of Dr. Fowler's Extract of Wild Strawberry, which has been on the market for the past 77 years, and has saved the test of time.

Mrs. Geo. Chapman, Sudbury, Ont., writes:—"I am the mother of five children, and I must say they are seldom sick in need of medicine. They are, however, sometimes troubled with summer complaint, diarrhoea, with colic, but I always find there is no cause for worry as I just give them two or three doses, no more, of Dr. Fowler's Extract of Wild Strawberry. It is a remedy that all mothers should keep in the home for the children."

"Dr. Fowler's" is 50c a bottle; put up only by THE T. T. Milburn Co. Limited, Toronto, Ont.

To Remove Scorch Marks

Scorch marks on cotton or linen goods will yield to an application of salt and lemon juice. Cut a slice of lemon, moisten a little salt with the juice, and rub this over the scorch. Rinse with cold water, and, if necessary, repeat the process. Dry in the sun, or expose to the fresh air, for half an hour.

STOMACH MISERY, GAS, INDIGESTION

"Pape's Diapiesin" Corrects Sour, Upset Stomachs at Once

"Pape's Diapiesin" corrects sour, upset stomachs, flatulence, heartburn, sourness, fermentation or stomach distress caused by acidity. A few tablets give almost immediate stomach relief. Correct your stomach and digestion now for a few cents. Druggists sell millions of packages.

Costly Picture Frame in Milan

The frame that encloses "The Virgin and Child" at the Milan Cathedral is said to be the finest in the world. It is eight feet long and six feet wide, formed of hammered gold, with an inner moulding of lapis lazuli. At the corners are hearts designed in large pearls and precious stones. This picture frame is probably worth upwards of \$250,000.

An Automatic Lighthouse

Daylight works an automatic lighthouse erected on the Swansea coast; evening, with its fading light, causes the illumination of the lamp, while dawn extinguishes it, by chemical action.

The Boy Scout movement originated in England.

The ancient walls of China are being used for rock quarries in road building.

Situation Is Tense Between The British And Turkish Nationalists

Constantinople.—The situation between the British and Turkish Nationalists is extremely tense.

A note from Kemal Pasha to Brigadier-General Harrington, the British commander, couched in a hostile tenor, is not regarded among British military circles here as opening the door to a specific settlement of the straits question.

The note demands the retirement of all the British troops from the Asiatic side of the Straits, as the French and Italians have done, and Kemal says, in case of acquiescence, he will withdraw the Nationalist forces "slightly from the neutral zone."

It also demands the cessation of what are termed the arbitrary measures of the British authorities in Constantinople in dealing with the Turkish population and a solemn undertaking that no Greek vessel be permitted to pass the Dardanelles. It concludes with a protest against the destruction of Turkish war material in the Straits. The note to Kemal was in reply to the last written communication of General Harrington, transmitted through Hamid Bey, the National representative to Constantinople to Kemal in Smyrna.

It is felt in British circles that they would be forced to modify their conciliatory attitude at the moment the Turks bring up heavy artillery with which they would be able to seriously threaten the European side of the Dardanelles and also hamper passage through the Straits of British vessels.

Six submarines of the British Atlantic fleet have arrived and will be used to prevent the transmittal of Turkish troops across the Sea of Marmara in the event of war between the British and Turks. The British also have posted batteries in strategic positions on the Asiatic side of the Bosphorus.

If Kemal persists in his demand for the evacuation of the Asiatic side of the Straits, it is believed the British in no circumstances will alter their resolve to preserve the inviolability of the international waterway.

A formidable fleet of British floating fortresses and powerful bombing and combatant aircraft, together possessed of greater destructive power than the British grand fleet at Scapa Flow, now guards the great international waterway of the Near East from the narrow to the Black Sea.

British gigantic armadas in these waters is led by the two 34,000-ton super-dreadnoughts, Revenge and Resolution. Then come the three formidable battlecruisers, Queen Elizabeth, King George and Iron Duke. Some of these super-war craft possess ponderous 15-inch guns having a range of 20 miles. The remainder of the British naval fighting force here consists of a number of the most modern cruisers, destroyers and the airplane carriers Pegasus and Argus.

The British are confident that this formidable line of fighting ships will easily prove a time wall barrier to the Kemalists should the latter attempt to cross the Straits. It is also thought they will be a sufficient protection for the troops entrenched at Chanak and other points.

EXPECT BITTER CONTROVERSY IN U.S. OVER SEARCHING SHIPS FOR LIQUOR

Washington.—Announcement that the United States Government will pursue a moderate course as to the enforcement of prohibition along the coast, and will not seek to search vessels beyond the three-mile limit, save in exceptional cases, will undoubtedly serve to stir up a bitter controversy in this country. The announcement is linked upon as a diplomatic victory for the British Government, backed by Canada, inasmuch as the British Ambassador, Sir Auckland Geddes, protested against the activities of the prohibition "navy" beyond the three-mile limit.

But the announcement of the Government's policy will not be satisfactory to the "dry," whether in Congress or out of it. The "dry" insist that as a result the smuggling of liquor into the United States will be much increased. They are prepared, if it does increase to protest vigorously when Congress meets again and to try to extend the three-mile limit by law.

Can Summon Parliament For Emergency Session If Situation Warrants

Ottawa.—Unless developments in the Near East should necessitate the calling of an emergency sitting, it is unlikely that the Cabinet will meet this week. No Cabinet meeting has yet been called and none is in prospect at the moment.

As far as can be ascertained, the action of the Government in the event of hostilities in the Near East would be confined to the immediate calling of an emergency session of Parliament. Members would be summoned to Ottawa with the least possible delay.

The Prime Minister is understood to be in receipt of cabled information from the British Government daily, and while taken in conjunction with the news despatches, enables him to follow the trend of events carefully.

London, Ont.—Believing that some action should be taken by Canada to give Great Britain full support in any

Coal Shortage In Ontario

Allowed Only Month's Supply Of Anthracite At A Time

Toronto.—Fuel Controller Ellis has issued a statement announcing that by order-in-council the price of American anthracite coal will be fixed at \$15.50 a ton for the present, and householders anywhere in Ontario are prohibited from holding or storing more than one month's supply of American anthracite. This applies only to coal delivered after the date of the order. Dealers are also forbidden to deliver to any household more than a month's supply at a time.

The appointment of fuel administrators by municipal councils has also been provided.

Vancouver Battery Wins

Canadian Artillery Association Announces Result of Competition

Ottawa.—The 31st Battery, Vancouver, were winners of the Governor-General's Cup for the first place in the efficiency field artillery and general efficiency of personnel competition in the Canadian Artillery Association competitions. It has been officially announced.

These competitions, which were open to all field, heavy and siege batteries in Canada, were held throughout the training camps of the Dominion during the past summer.

Italian Settlers for Canada

Montreal.—Twenty thousand Italians will arrive in Canada early next spring, according to announcement made by the Italian shipping agent here. Many are returning after spending a couple of years in Italy following war years. The western provinces will get twenty-five per cent of the newcomers.

Six thousand Rumanians are planning to come to Canada and start farming in the west.

Shortage of Figs

Washington.—A shortage of figs is threatened by the trouble in the Near East, according to a report to the Commerce Department from the commercial attaché at Athens.

No figs or currants have been shipped from Smyrna, he reported since the military operations around that city began, and it is estimated that there will be a loss of approximately 70 per cent of the fig crop.

Calgary's Rapid Growth

Calgary.—Greater Calgary's population is 78,479, according to the 1922 edition of Henderson's Directory, just issued. This is about 15,000 more than given in the Federal census for Calgary proper in 1921.

Einstein Goes to Japan

Berlin.—Prof. Einstein, the German scientist who evolved the theory which bears his name is scheduled to sail for a six months' lecture tour in Japan.

BANDITS MAKE BIG HAUL

ROB SAFES OF BANKS AT MOOSMOUNT AND CEYLON, SECURING CONSIDERABLE BOOTY

Regina.—A gang of bandits blew the safes of the Union Bank at Moosmount and the Bank of Montreal at Ceylon, making a clean getaway with \$14,700 cash, and \$16,000 in securities. The securities and \$7,000 in cash were taken from the bank at Ceylon and \$7,000 in cash in the Moosmount robbery. The robberies were carefully planned, the bandits placing sentries at points of entrance to the banks and using force to stop any possible interference with the operators who at work with nitro glycerine on the vaults and safes.

Moosmount is 135 miles east of Regina on the C.P.R. main line, and Ceylon is about three miles west and 68 miles south of the city on the Hudson-Bethouche branch of the C.N.R.

Both bank buildings were damaged, over \$5,000 being the loss to the building and equipment at Moosmount, and over \$2,000 at Ceylon.

The bandits used telephone and telegraph cable leading into both of the towns, and at Moosmount John McDonald, C.P.R. night operator, taking him to the bank so that he would not be able to give any alarm. Another person was molested during the raids.

Three C.P.R. trains were stalled for some time at Moosmount during the night, while McDonald was held by the bandits. After they had left the bank he walked to the station, and there a commercial traveler and the night clerk of the Queen's Hotel freed him by cutting the ropes. McDonald then dispatched the trains.

Adopts Canadian Invention

Lieut. Brodeur Designs Working Model of Battleship Gun Turret

Ottawa.—The British admiralty has adopted for instructional purposes in naval gunnery, a working model of the lower part of a battleship gun turret, invented and designed by Lieut. Victor G. Brodeur of the Royal Canadian Navy. Lieut. Brodeur is a son of Justice Brodeur of the Canadian Supreme Court and is on the naval headquarters staff at Ottawa. The British admiralty has complimented Lieut. Brodeur on his efficiency. The model exposes all the working parts of a turret to gunnery students.

Canada Interested In Imperial Fruit Show

Over Eight Hundred Boxes Have Been Entered By Growers

Ottawa.—Entrants for the Imperial fruit show 1922, which is to be held at the Crystal Palace, London, Eng., from Oct. 7 to Nov. 4, are now closed.

That this show has aroused very considerable interest throughout the fruit districts of Canada is evidenced by the fact that over eight hundred boxes have been entered from Canada alone with practically all the fruit growing districts in Canada, with the exception of New Brunswick, participating.

Had Rough Passage

New York.—The French liner Lafayette from Havre, reached port after having passed through an equinoctial cyclone in mid-ocean which, its passengers related, reared mountains of sea, greatly impeding the progress of the vessel and caused Captain Brevet to have everyone go below decks for 24 hours.

Ontario Professor for Edmonton

Guelph, Ont.—Prof. J. P. Sackville, for the past seven years connected with the animal husbandry branch at Ontario Agricultural College, has resigned to accept a position as head of the animal husbandry branch at the University of Alberta in Edmonton. He will leave Guelph in two weeks to take over his new duties.

Will Provide Nurses

London.—Reuters' Simla correspondent cables that the president of the Anglo-Indian (domestic Europeans) Association of India, has offered the Veterinary services of his community in providing a contingent of nurses to be employed in the Near East in the event of an outbreak of war.

Car Shortage May Close Buffalo Elevators

Supply Is Limited and Situation Is Considered Grave

Toronto.—A special despatch from Buffalo to the Globe says: Vessels at the Buffalo elevators Sept. 27 had 1,319,000 bushels of grain and elevators unloaded 1,396,000 bushels. There has been but slight improvement noted in the car supply here, and elevator men said that unless there is a big increase in the number of cars available for forwarding grain by the end of the week, elevators will be obliged to stop receiving grain. Other industries are handicapped in a similar manner, and altogether the situation is considered grave.

Bermuda Struck by Hurricane

West Indies Island Sustains Heavy Damage in Storm

Halifax.—Damage, variously estimated at between \$200,000 and \$250,000 was caused by the hurricane which swept Bermuda on the morning of September 21, according to advices to the Halifax and Bermuda Cable Company here.

Hundreds of houses were wholly or partially unroofed, wharves were washed away and roads gutted by a phenomenal tide. If exposed places stone buildings collapsed like houses of cards. It flooded the market square to a depth of three feet. St. George Hotel roof was blown in half. Many small cars were destroyed. There was no shipping at Hamilton when the hurricane struck, but wide damage was done to small boats.

Feed Sheep On Screenings

10,000 Sheep Will Be Fed At Fort William

Winnipeg.—Ten thousand sheep will be fed on screenings this year at Fort William and Westport by R. C. Harvey, of Lethbridge, the well-known sheep rancher, who was in Winnipeg recently, after completing arrangements for the care of his large flock.

He fed 7,000 at this point last year and found that had been regarded as a drug in the market could be profitably turned into prime mutton. Of this lot 4,000 were sold for shipment to New York and the remainder found a ready sale on the Toronto market.

Mines Speeding Up

London.—The Koffy Fontain Diamond Mines of the Orange Free State are resuming full time operations after working on a five-day week basis since the slump in the diamond trade, says a Reuters despatch from Cape Town.

German Debt Increases

Berlin.—Germany's floating debt increased between September 10 and 20 by 19,475,000 marks. During the first ten days of September it increased 10,345,000 marks.

Denies Report of Suggested Alliance

Berlin.—The German Government has issued a denial of reported negotiations for a Russo-Chinese-German alliance.

CONDEMNNS SHIPMENT OF POTTED MEATS

HEALTH OFFICIALS AT CALGARY SEIZE IMPORTED ENGLISH GOODS

Calgary, Alta.—Inspector Hibbs, in charge of the Dominion Health Inspection Office here, announced that he had seized 410 glass containers of potted meats, exported to Canada by a London firm. The meats, which comprise many different varieties, reveal under analysis strong indications of the presence of bacterium botulinus, which is extremely poisonous.

The shipment, the whole of which has not yet been rounded up, was in the hands of local jobbers, and part had been distributed to retail grocers. It is believed that none of the product has got into the hands of consumers, although as a special precaution, Inspector Hibbs has made a public announcement warning the general public against taking chances with goods bearing the condemned brand.

Women Leaders In Thought

Mrs. L. C. McKinney Quoted As Saying Women Have Place in Politics and Pulpit

Toronto.—A quiet, dignified and thoughtful person is Mrs. L. C. McKinney, of Alberta, who is in Toronto attending the Methodist conference. She is an exponent of the Legislative Assembly of Alberta, and an official delegate to the conference. She has decided opinions on women's place in the church.

"Certainly I feel that women have a right to be in the pulpit," said Mrs. McKinney. "A woman who is fitted for it and has a real desire to do it should be allowed to preach. It is impossible, of course, for married women with a family, but there are plenty of unmarried women who are well qualified for the task."

Mrs. McKinney also feels that women have a vital place in politics. "When I was in Parliament I was interested in questions involving moral issues and the rights of women and children," she said, "but I don't think a woman's interest in politics should be purely social."

"Do you approve of dancing?" she was asked. "I don't think so," answered Mrs. McKinney, slowly. "I have never danced myself and I feel that much of the modern dancing is very deplorable."

Mrs. McKinney feels that prohibition has been a success in the west. "We have the great disadvantage in Canada, however, that prohibition is not a Federal enactment," she said. "A good deal of liquor is brought into Alberta from British Columbia."

Reduce Aid For Rural Schools

Government Will Continue Policy Only When Absolutely Necessary

Ottawa.—The Government aid to public schools in various parts of Alberta in the way of loans to rural school districts for ordinary operating costs, will be considerably reduced this year. The policy of making such loans through the department of education will be continued on similar lines at last year, but only in absolutely necessary cases, and on the basis every year of shorter school terms, a minimum of government assistance being the rule. It is expected that the amount of money to be paid out in this way will not exceed, for 1922-23, about \$100,000, as compared with \$300,000 for 1921-22.

Reduce Hospital Expenses

Better Showing For Municipal Hospitals in Alberta

Edmonton.—Hospital expenses in Alberta, so far as the municipal hospitals are concerned, are coming down. The average cost per patient per day for the first six months of this year, according to public health department figures, was \$2.80, as compared with \$3.49 for a corresponding period in 1921.

This cut has been made possible, it is stated, by improved internal management, the loyal support of all the municipal hospitals by the people of the districts interested and market declines in the price of certain supplies.

To Aid Cancer Research

London.—The Federation of Medical Allied Services of which Sir Berkeley Moynihan is president, has decided to urge the Government to allocate £700,000 to cancer research. John P. Lockhart-Mummery, cancer specialist at St. Mark's Hospital, London, said the serious phase of cancer was that the disease preferred to attack the healthy, hard working people, not the drones or weaklings.

Official Killed in British India

Madras, British India.—Scott Coward, assistant district commissioner of the Madras Police Department, was shot dead from ambush in the Duguid Hills. Three constables are reported to be missing. A band of about 300 rebels recently has been creating disturbances in the region where the ambassador was laid.

Honor For Lord Byng

Winnipeg.—The University of Manitoba will confer the honorary degree of Doctor of Laws on Lord Byng, Governor-General of Canada, at a special convocation here on October 5.

British Reinforcements Hold Strong Positions In Threatened Area

NO MORE INDEMNITY PAYMENTS THIS YEAR

CONFERENCE IN DECEMBER TO SETTLE QUESTION OF FUTURE PAYMENTS

Paris.—The Allied Reparations Commission approved the German treasury notes for \$6,000,000 marks delivered to the commission in payment of the August and September allotments due to Belgium. The notes were then forwarded to Brussels. The action of the commission formally disposes of cash reparations payments for the remainder of this year.

The question of payments for 1923 is expected to be settled at the forthcoming Brussels conference on reparations and inter-allied debts. It is planned to hold early in December.

War Upon Drugs

Authorities Want All to Co-operate to Stamp Out Evil

Ottawa.—Co-operation between municipal, provincial and federal police forces; the formation of special "dope" squads in larger cities, and eternal vigilance are necessary to stamp out the drug traffic in Canada, according to federal officials charged with enforcing the Opium and Narcotic Drug Act.

The act provides stiff punishment for dope traffickers and deportation is already provided. Canada has a careful system of checking legitimate imports and the distribution of the drug once it leaves the hands of the importers. But, according to federal officials, a certain amount of leakage and lack of co-operation between the different forces is a handicap to the effectual stamping out of the scourge.

Montreal is at present the worst centre of illicit drug traffic in Canada, according to P. W. Gower, who is chief of the branch of the health department enforcing the laws.

British Capital For Canada

Earl of Stafford Is Impressed With Opportunities in This Country

Saskatoon.—The visit of the British parliamentary party to Canada will probably have a great effect on the sending of British capital to Canada in the near future, said the Earl of Stafford, who visited here with the Montreal Board of Trade party.

"We have had an opportunity to see your wonderful country for ourselves, and we are delighted with it," he said. "I am not able to make any statement as to the financial condition of the country, my impression is that things are looking up in Canada and that there is little reason for fear."

Anglicans to Open Doorway

London, Ont.—With but one dissenting voice the Provincial Synod of Ontario of the Church of England in session here voted to open the doorway of their church to ministers of other denominations. The decision was described by several as a decided step toward church union.

Will Evacuate Siberia Provinces

Tokyo.—Japan will proceed with her programme for the evacuation of the maritime provinces of Siberia, regardless of the breakdown of the Changchun conference, according to Masano Hanihara, Japanese delegate to the arms conference at Washington.

Interest On War Debt

Washington.—Great Britain has been advised that payment of \$50,000,000 on October 15, an interest on her war debt will be acceptable pending an adjustment of interest rates by the forthcoming funding negotiations, it was stated at the United States treasury.

Constantine Succeeded By Crown Prince George To Throne Of Greece

Athens.—King Constantine, bowing to the will of the army and navy, has abdicated, and Crown Prince George, who married Princess Elizabeth of Roumania, becomes King of Greece.

A street demonstration by prominent citizens acclaimed Venizelos and a republic. There was some rioting and former Minister of Agriculture Sideris was wounded.

Constantine twice occupied the throne of Greece. His first reign began March 18, 1913, with the assassination of his father, George I, and continued until June, 1917, when he was forced by the demands of Great Britain, France and Russia to abdicate because of his pro-German sympathies.

He was succeeded by his second son, Alexander, who was nominated by the deposed monarch, and who

Constantinople.—Events are surely approaching a climax. The Turks have occupied the entire neutral zone on the Asiatic side of the Dardanelles with the exception of the Chanak area, around which they have established infantry units in a semi-circle, virtually investing the British lines.

The Turkish instructions to the men in the Chanak sector are to advance the farthest possible without meeting resistance. They are now practically against the British entrenchments, and obviously the situation cannot be indefinitely prolonged. The Turkish cavalry squadrons are retiring, and the British troops, who are in strong force at Chanak, are ready for whatever may happen.

British reinforcements are reaching here and the threatened area. The super-dreadnoughts, Revenge and Resolution, the most powerful fighting machines afloat, have arrived in the Dardanelles, while a battalion of North Staffordshire and 1,000 men of the British air forces landed and marched through Constantinople with bands playing. Their presence has helped bring about a reassuring effect. Notwithstanding the Kemalists' concentrations around Chanak, the British are confident of holding their lines against all odds. They declare that their tanks are well protected by the fleet. The battleships, with their 16-inch guns, can sweep the whole area around Chanak for a distance of 20 miles, and it is possible for the British to dismount some of their great naval guns and use them for shore batteries.

The Turks at present have only machine guns in the Chanak area. If they have brought up heavy artillery, the security of the Chanak may be seriously challenged, the British admit, but the entrenchments in this sector are said to be more efficient than any used in the Great War. Since September 11, 2,000 men from the army have been steadily building trenches and setting up gun emplacements.

Waterspout Wrecks Fishing Boats

Seven Men Lose Lives In Storm on Mediterranean

Paris.—A waterspout in the Tyrrhenian Sea (between the islands of Corsica and Sardinia and Italy) is reported by the Petit Parisien to have drawn two fishing boats, with crews of men on board, up to the skies until they disappeared completely.

A storm threatened this sailing fleet, and the boats were hurriedly seeking shelter when a terrific waterspout appeared and scattered them. Two boats were caught by the spout; the rest escaped.

Soviet Sympathizers Object to Film

Leipzig.—The audience in a suburban motion picture theatre was given a taste of real Wild West action when a score of armed men, believed to be Communists, raided the house and confiscated a film depicting alleged chaotic conditions in Russia and the consequences of the military power of the Soviet Government.

Want Men to Marry Early

London, Ont.—Men of today need to be encouraged rather than discouraged in matrimony, it was held by the majority of the members of the lower house of the Provincial Anglican Synod, which refused to endorse the principle of making 21 years the minimum age for young men entering the marriage state.

Catholic Women Would Aid Colonizing

Winnipeg.—Assurance that the Catholic Women's League of Canada would co-operate with the Canada Colonization Association in any property conducted to endow settlement scheme was given by Mrs. M. G. MacNeil, Winnipeg president, at a banquet in connection with the convention of the league here.

Constantine Succeeded

By Crown Prince George To Throne Of Greece

had promised to carry out Constantine's policies, despite Allied demands to the contrary. For three stormy years Alexander reigned in name only. Then his tragic death in 1920, due to the bite of a pet monkey, again turned the spotlight on Constantine, who had spent the intervening three years in exile with his large family.

A plebiscite had shown that the Greek nation was insistent upon the return of Constantine to the throne, and while the Allied Governments continued to exert every measure at their command to prevent his re-ascension, the former King marched triumphantly into Athens and was crowned in December, 1920, amid scenes of the wildest enthusiasm.

DID YOU KNOW THAT

BORN.—To Mr and Mrs A. Dell Wilson, on October 3rd, a son

The Rev. Mgr. Tanguay, procurator of St. Charles' seminary at Sherbrook, Que. is in town for a short stay on business connected with his interests in this district.

Mr. A. Lister, and old-timer resident was in town for a couple of days at the week end.

After a summer spent on the farm Mr. J. Bear is moving back to town.

Mr. T. A. Horne, of Edmonton is relieving at the Union bank during the absence on holiday of Teller D. Wade.

Quite an improvement is being effected at the depot by the addition of an additional room upstairs and a window in the roof.

Mr. J. W. Stuart has shipped several carloads of cattle and hogs this week, the animals going to Edmonton and Winnipeg.

According to latest advices, the parliament of Alberta will open its session on or about December 7th, next.

We are glad to hear that little Allen Spence is now recovered from recent attack of scarlet fever.

It is possible quite in order to remind several car owners that it is strictly against the provincial law to operate a motor vehicle with the "cut-out" open. In addition to this, it is often very annoying to sick people.

Just now, when house heating is starting, is the dangerous time for fires. Get your property insured. See Joe Welch.

Mr. Hugh Thompson, of Regina has arrived to commence his professional duties at the Wainwright Studio.

In order to be on hand on Monday for the opening of Supreme court Messrs Fraser, Binn, Biss and several others left for Edmonton to do their jury duties. There is a fairly heavy docket with two murder cases.

Mr. J. Biss on with his wife and her mother Mrs. Bouchard left on Monday for Three Hills, Alta where Jack will open up a butcher business. We wish him luck in his new venture.

Mrs. J. A. Fraser who was visiting her son, Melville in town returned to her home in the city on Monday.

Mr and Mrs Ed. Foster and children left on Thursday last over the Canadian National for their new home at Chilliwack, B. C.

Mrs. Chas. Church and baby left last week end to spend the winter with friends in Calgary.

Mrs. J. Foster who was visiting with her son Ed. left for Chipman last week end, to spend a short stay with another son there before returning to live with her son Walter at Biggar.

Your property will be worth a lot of money if the drillers now at work strike oil or gas. Don't let it be sold for taxes but get the benefit of the 5 p. c. discount up till November 1st.

Buy your winter's supply of Black Diamond coal from the Atlas company while prices are low.

The winter time card of this district on the Canadian National only shows one change trains this being that No. 3 (Wainwright-Edmonton local) leaves at 6.45 in the morning instead of 6.15 a.m. The returning time is the same—arriving at 23 k.

Miss Billie Creighton is visiting her sister Mrs. Ray Greer, where Miss Myers is also a guest.

Saskatoon

Sask.

Mr. W. Brown while out hunting last week had the good fortune to bring down two splendid wild geese but we guess they must have been tough eating for Bill never sent along a sample to the editor. (sour grapes.)

The L.A. of St. Andrew's church take this opportunity of giving assistance and gifts made the recent dinner and supper so successful. They are holding a number of unclaimed plates.

The sympathy of the whole community is extended to Mrs. M. O'Connor, of Gilt Edge who on Friday received the sad news that her father, Mr. J. Shannon, had passed away at his home in Marjona, Ont. at the age of 70 years.

Mr. Danny Evans who was a resident here some eleven years ago, is renewing acquaintances while on a short stay. Danny says that the burgh looks real good to him, yet! You bet!

An up to date house is being erected on the farm of Mr. Rufus Carl east of town.

All next week—October 7th to 14th, the local corps of the Salvation Army will celebrate their harvest festival services, when a hearty welcome is extended to all to attend. Your assistance is sought in this worthy cause too.

Buy Black Diamond coal before the cold weather makes it scarce. See J. Welch at the Atlas Co.

Mr. A. Hoare has moved his family into the Plaxton house on Fifth avenue east.

Mr. A. A. Taylor, who farms north of Fabyan has rented the Ward house for the winter.

Mr. R. J. McDougall, of Burt Falls, Ont., has returned home after an extended visit with his sister Mrs. J. F. Wilson and his brother Tom.

The services in connection with harvest will be held in St. Thomas church next Sunday at 11 a.m. and 7.30 p.m. Harvest music and decorations.

Mr. Claude Dean, of the Union bank staff, who has been recuperating after his recent operation in Edmonton, is now recovered and returned to his duties on Monday.

The Rev. A. Smith, a Presbyterian minister who is in town in connection with the British and Foreign Bible Society, spoke in St. Thomas church after the usual service on Sunday evening last.

For houses to rent, or fire insurance, see Joe Welch.

Mr. W. R. Herbert, Edmonton manager of the British American Paint Co., was in town last week on a visit to Mr. J. Welch.

We are glad to know that little Willie Bisop, the wee chap who fell from the running board of a Ford car last week, is now able to be around again. The practice of allowing children to ride thus on autos around town is one which should not be allowed. It is too dangerous.

We are glad to know that Mr. S. Ridley, an employee of the Alberta livery barn, who fell and broke his leg last week is doing nicely.

Miss Isabel Dean, arrived on the S.S. Montcalm from England on an extended visit of over 12 months at her old home at Colwyn Bay, Wales. She is staying with her mother at St. Thomas' vicarage preparatory to proceeding to the Pacific coast.

Tomorrow-

May be a Cold Day. How about your Heater?

We have a Good Stock of McClary's Heaters, Stove Pipes, Elbows, Tapers, Tees, Dampers, Etc.

We Get Repairs

for all makes of Stoves. Fix them up before the Cold Weather.

WASHBURN'S

IF IT'S HARDWARE

WE HAVE IT

We understand that Mr. and Mrs. Reg. Pecknold, of the park staff are going to spend the winter at the coast.

On account of the plentiful crop of B.C. fruit, it has seemed more in demand this year, and no less than twenty-two carloads of the finest have been unloaded at this point.

Several of the town buildings are receiving that necessary protection—a coat of paint. Among these are the Horn home and Star office. Jimmy Madder is the brush wielder in the first case and the Cofield boys are the artists in the second.

Mr. J. Harte, recently of the Union bank staff has been transferred to the branch at Carstairs.

Don't let Jack Frost catch you with an empty coal bin; order a load of Black Diamond coal from Joe Welch at the Atlas yards.

Mrs. Catherine Horne announces that she is prepared to take Maternity, & Hospital Cases at her home on SECOND AVENUE Phone 79 Wainwright
